

CARBON NEUTRAL FUELS TO ENABLE THE ENERGY TRANSITION

CATO meets the projects – Utrecht 2017.11.15

Geert Laagland – Head of Engineering – BA Heat – OU Heat Projects

PURPOSE STATEMENT

As Vattenfall we exist to:

POWER

CLIMATE SMARTER

LIVING

... 100% free from using fossil fuel throughout the entire value chain of energy production in one generation

... using the word “smarter” indicates continuous improvements

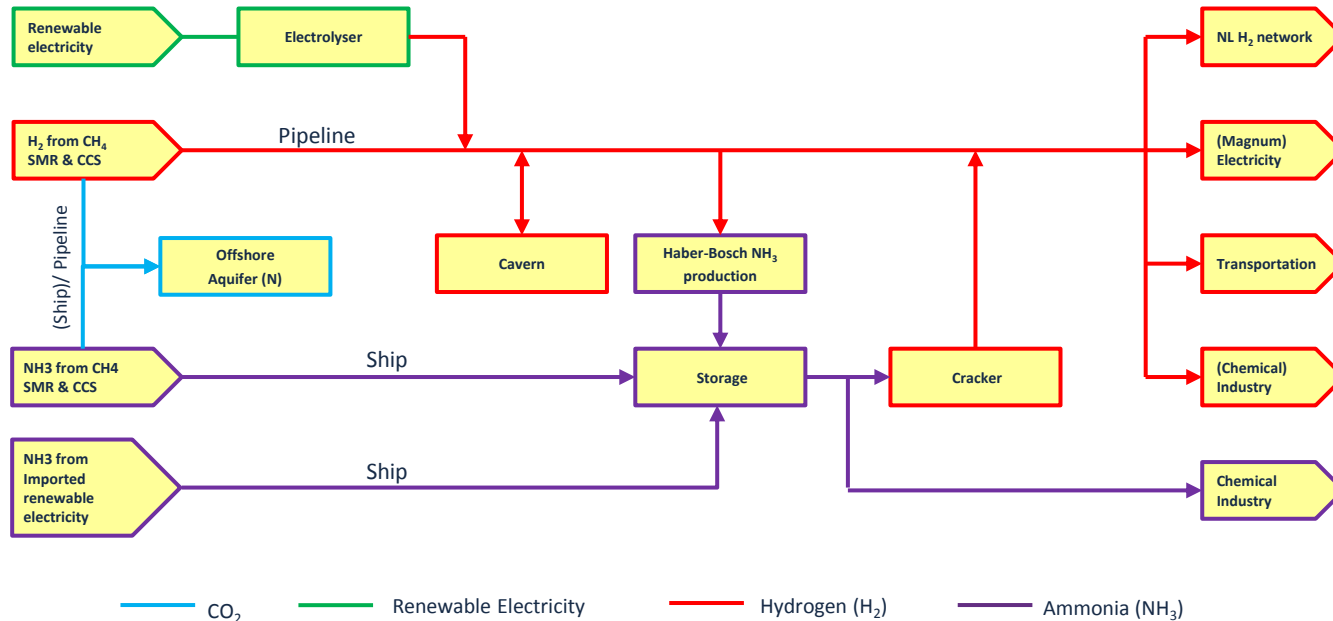

... for everyone; a way of working, a way of living today and for the future

MAGNUM AS A SUPERBATTERY

- 3x MHPS 701F4 gas turbine combined cycles (CCGT)
- Output 3x437 MW_e, (2 million households)
- State of the art, year of commissioning 2013
- Flexible (daily start/stop) and high efficient
- Good logistic options (seaways)
- Excellent grid connection (2x1400 MW_e, 380 kV)
- Engineered for coal gasification (declined) and so:
 - Multi fuel turbines
 - 45 ha plant area, 40% occupied
 - Oversized DeNO_x

ROUTES FOR SUPPLY AND USE OF CO₂ NEUTRAL H₂/ NH₃

COOPERATING WITH OTHER PARTIES IS KEY TO SUCCESS

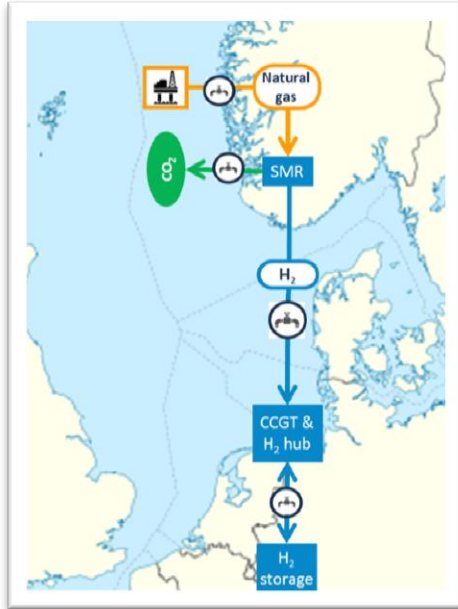

gasunne

SUPPLY OPTIONS H₂ FROM CH₄ + CCS

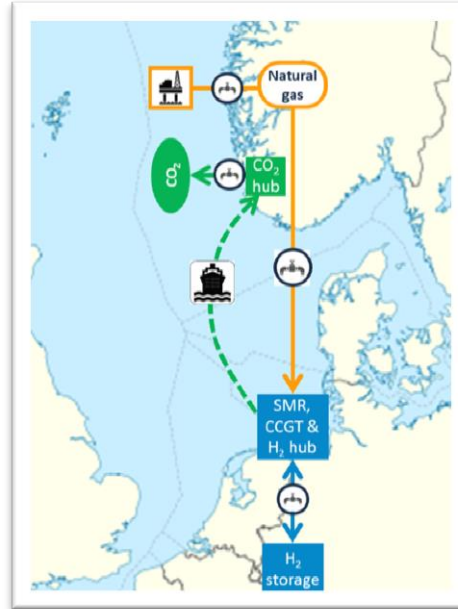

Option 1:

H₂ production in Norway

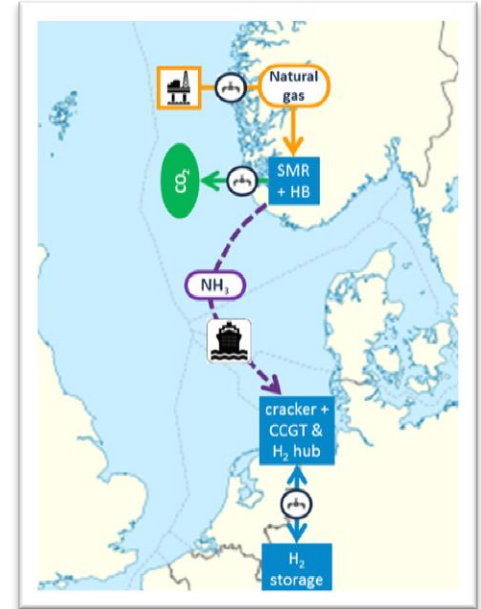

Option 2:

H₂ production in NL

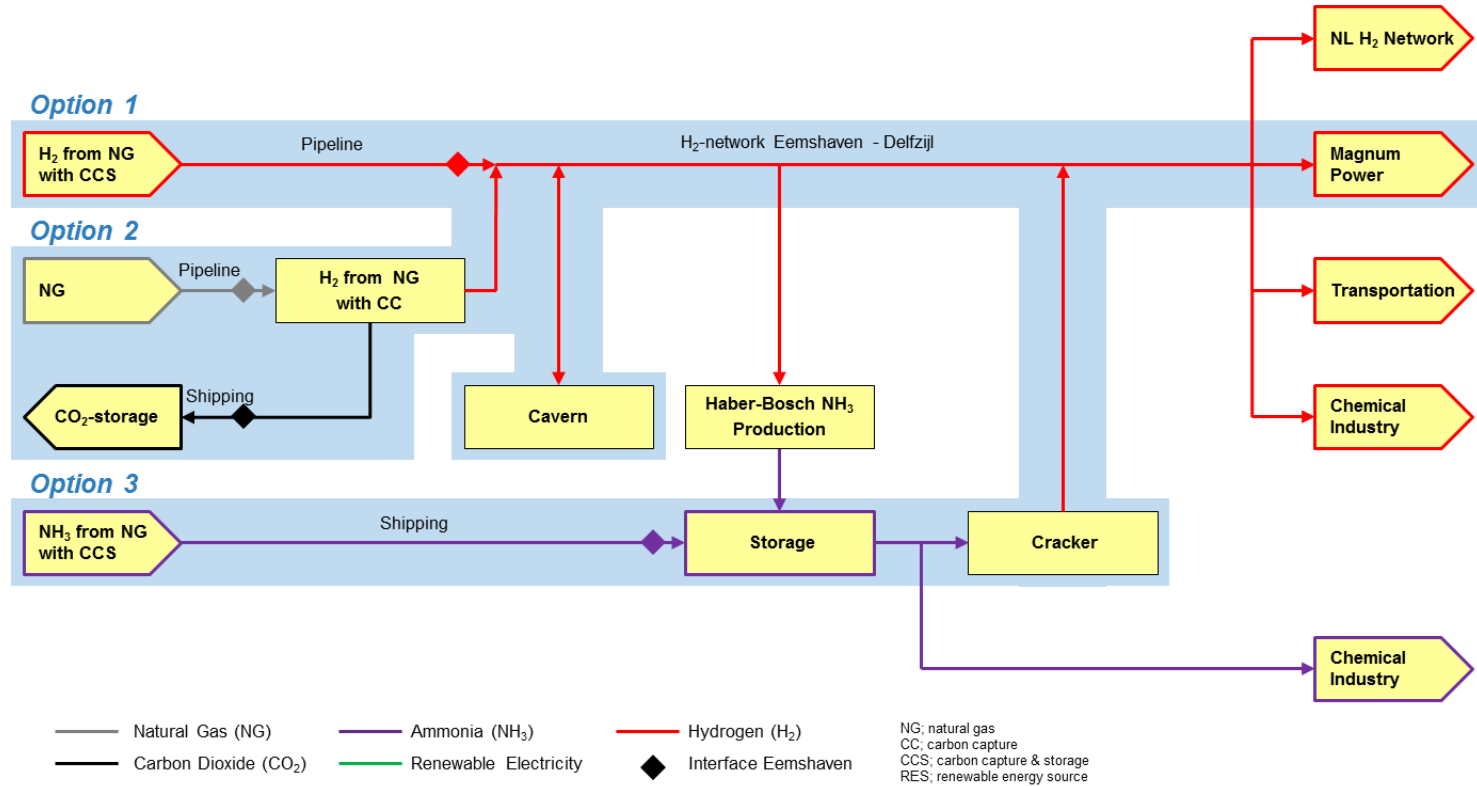

Option 3:

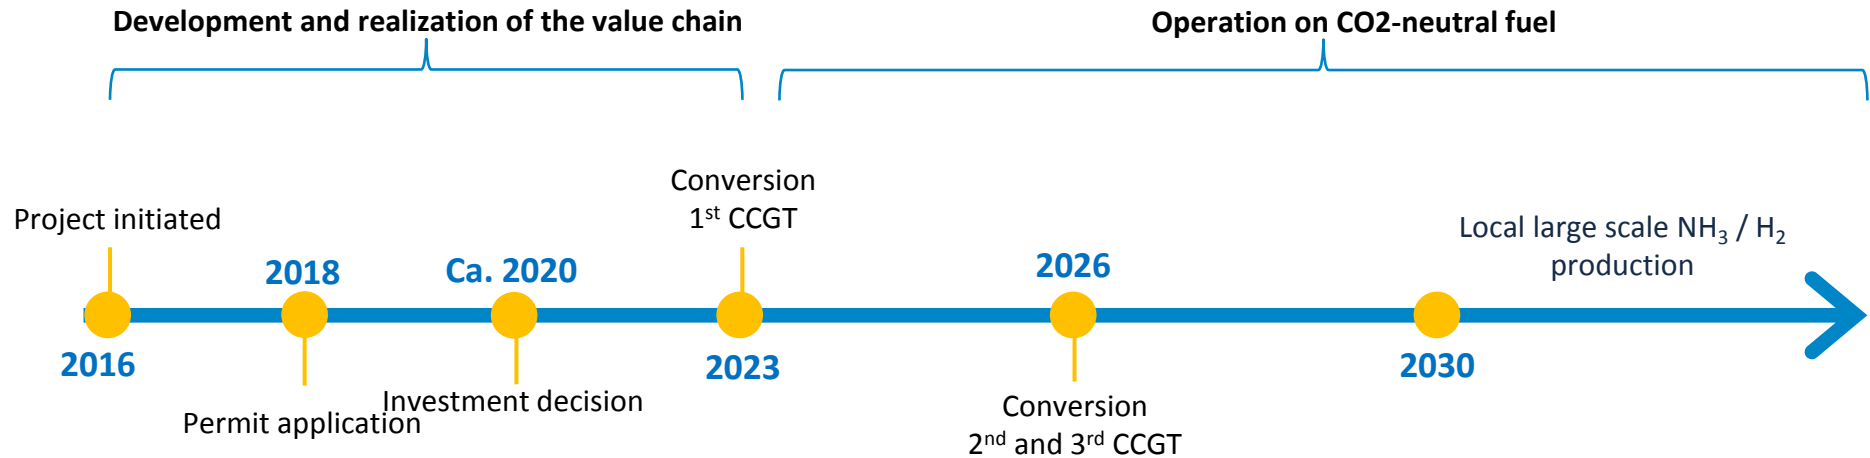

NH₃ production in Norway

STATOIL - GASUNIE – NUON H₂ & NH₃ VALUE CHAINS

HIGH LEVEL TIMELINE

KEY BENEFITS OF THE USE OF CO₂ NEUTRAL FUEL IN CCGTS

- Direct significant reduction of CO₂ emissions (Mton/a) in The Netherlands by replacing CO₂ emitting fossil fuel by CO₂ neutral fuels
- Facilitating integration of wind and solar capacity in the energy system by means of flexible capacity
- Optimal use of already existing capacity of natural gas fired power stations
- Catalyst for a H₂ based economy, facilitating transition to CO₂ neutral fuels and feedstocks in other sectors (industry, transport and heating)
- Technology fitting in the end objective: facilitating the growth of a CO₂-free H₂ economy and facilitating the feed-in of H₂ from renewable sources in time within the same system

An aerial photograph of a large industrial power plant facility, likely a combined cycle gas turbine (CCGT) plant, situated in a flat, open landscape. The plant features several large, light-colored buildings with numerous cylindrical tanks on their roofs. A complex network of pipes, scaffolding, and structural steel is visible throughout the site. Several tall, white wind turbines are positioned around the plant, with one particularly large one in the foreground on the right. In the background, a body of water is visible. The text "THANK YOU FOR YOUR ATTENTION!" is overlaid in large, bold, orange letters across the center of the image.

**THANK YOU FOR YOUR
ATTENTION!**
