and Climate Policy

# CATO CCS

Pim van Loon – 26th  
September 2023

# Supporting CCS via policy framework

- › Full legal framework in place
- › 1.600 Mt offshore storage potential
- › Contract of difference subsidy for most cost effective solutions (SDE++)
- › Investment in Research and Development: ACT, CETP
- › Public private partnerships / State owned Enterprises active in CCS market

Ligging van alle opslaglocaties die bijdragen aan de totale praktische opslagcapaciteit op zee.

# Recent milestones

- › MoU on transnational transport NL-Belgium – June 2023
  - › Tax on CO2 as waste removed – august 2023
  - › Irrevocable permits for Porthos – August 2023
  - › SDE++ opening 2023 round incl.
- CCS budget – sept 2023
  - › Development op Aramis with 3rd launching storage site
  - › Support for pre-FEED studies storage sites for the coming years – sept 2023

# CCS progress

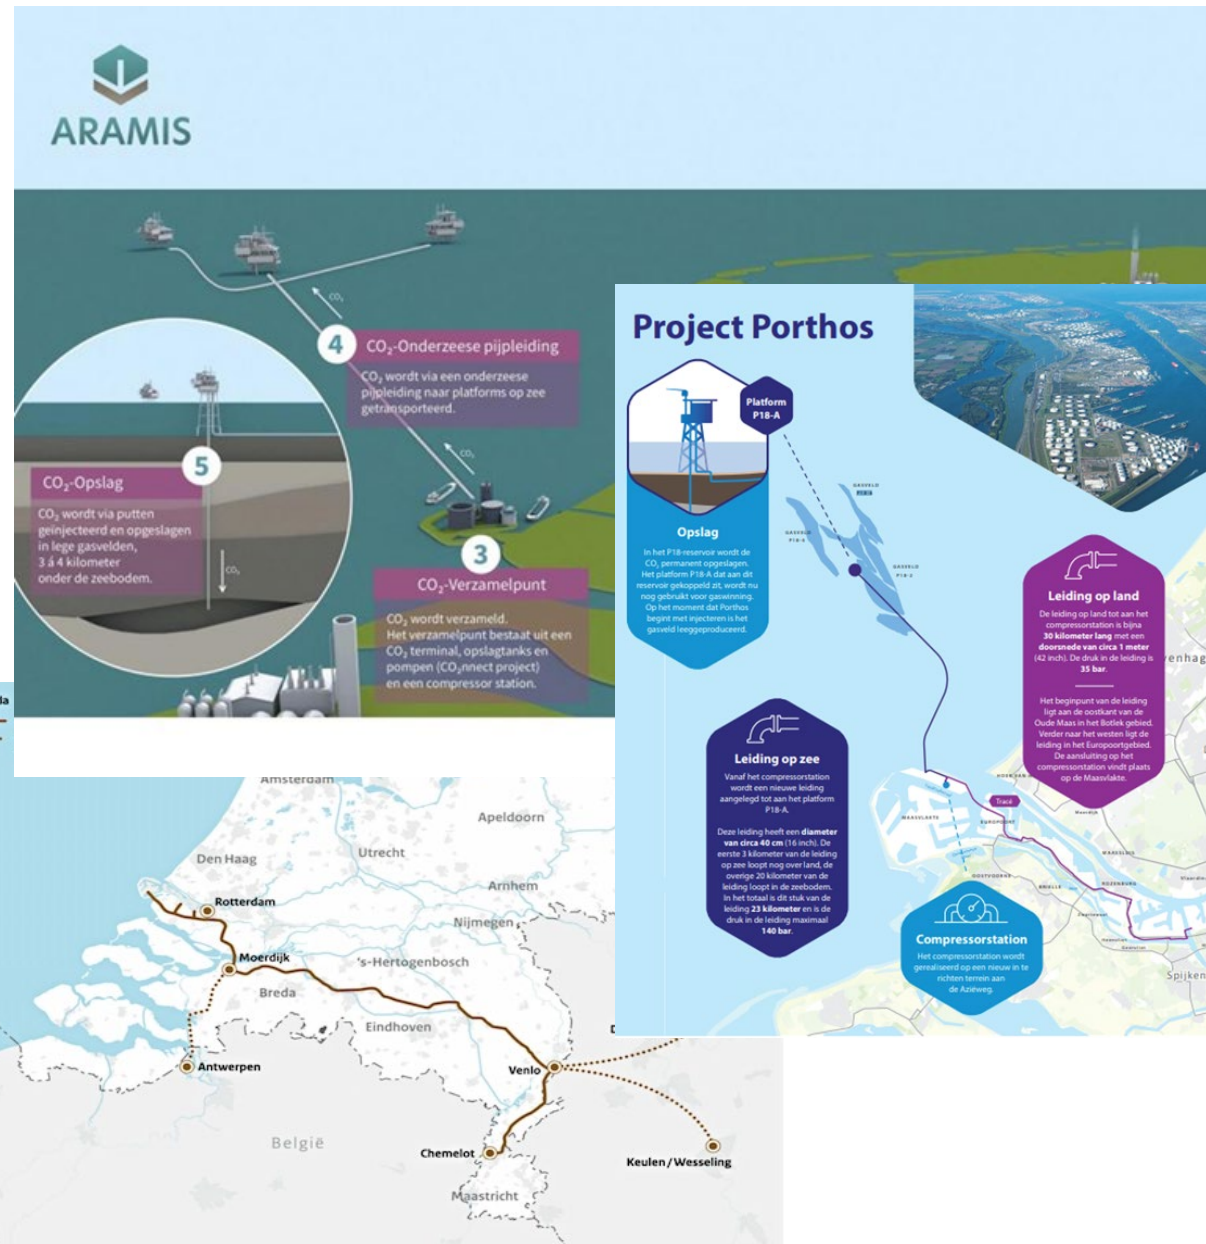

Porthos project: 2.5 Mtpa in operation 2026

Aramis almost in FEED phase → 2029

Delta Rhine Corridor procedure started

Multiple projects in feasibility phase incl; capture+export, direct injection

Start of a European Market

# Vision: open European CCUS Market

- > The CCS-market in Europe is open, market driven and cross-country
- > Cross boundary project are already a reality and will be more so in the future
- > The Netherlands will continue to be a key player in this market
- > Continuation of R&D developments

SEPT  
2023

## CO<sub>2</sub> storage projects in Europe
